Project Proposal

TripEase – Making travel easy

Requirements

Requirement No.	Requirement
1	As a general user, I want to buy a ticket for transportation from one location to another.
	Feature 1: The system will show the user all the available tickets for flights, trains and other transportation and choose a transport of preference.
	Feature 2: The system will allow the user to add ticket to cart.
	Feature 3: The system will allow users to confirm purchase.
	Feature 4: The system will provide a secure payment gateway for purchasing services.
2	As an admin, I want to add and manage tour plans.
	Feature 1: The system will allow the admin to add or drop tour plans.
	Feature 2: The system will show various tourist spots to choose from, relevant to the season and hype.
	Feature 3: The system will allow the user to select time and date of the trip and duration of stay.
	Feature 4: The system will allow the user to select tour plans..

Requirement No.	Requirement
3	As a user I want to be able to make my own budget and monitor my expenses.
	Feature 1: The system will allow the user to set a budget.

	Feature 2: The system will allow the user to track all the expenses by breaking down the cost.
	Feature 3: The system will provide multiple payment options (i.g. Credit card/debit card/mobile
	Feature 4: The system will provide a secure payment gateway for purchasing tour plans.

Requirement No.	Requirement
4	As a general user, I want to book a hotel/car for a specific duration of time.
	Feature 1: The system will show the user all the available hotels along with their specific price, amenities, location
	Feature 2: The system will allow the user to search and book hotels based on location, amenities and pricing.
	Feature 3: The system will allow the user to choose cars from integrated car rental services.
	Feature 4: The system will allow the user to add the selected hotel room and car to the cart.

Requirement No.	Requirement
5	As a user I want to check and post reviews for a better travel experience.
	Feature 1: The system will allow users to set preference as in bookmark their favourite spots, preferable budget range.
	Feature 2: The system will show the user destinations and activities based on bookmarked places, budget and higher ratings.
	Feature 3: The system will allow the user to rate and post reviews on the services based on their experiences.
	Feature 4: The system will show the user ratings and reviews of places from other users.
